Decrypt

Table of contents

1. Description

This application will decrypt a PDF document.

Note:

You must have the owner password to decrypt the document!

usage: java org.pdfbox.Decrypt [OPTIONS] <inputfile> [outputfile]

Command Line Parameter	Type	Default Value	Description
-password	string	None	Password to the PDF or certificate in keystore.
-keyStore	string	None	Path to keystore that holds certificate to decrypt the document. This is only required if the document is encrypted with a certificate, otherwise only the password is required.
-alias	string	None	The alias to the certificate in the keystore.
<inputfile>	filename	None	The PDF file to decrypt.
[outputfile]	filename	The output file	The file to save the decrypted document to. If left blank then it will be the same as the input file.
